

20 November 2020

Dear Parent/Carer

### COVID-19 Reminder

Please can I remind you if anyone in your household has either a new continuous cough, a high temperature, a loss of taste or smell the **whole** household must self-isolate for 14 days. If the person with the symptoms gets a COVID-19 test and it comes back negative the household can then stop self-isolating.

Several letters have been sent out from school recently with further advice about this however this key message is so important if we are to try and protect our school community.

I appreciate students wish to be in school. Some might have these symptoms and they are unrelated to COVID-19, but we have to be certain this is the case before they return to school otherwise the risk of spreading the illness increases.

Your support and co-operation are so important currently and we are very grateful for everyone working together in this way.

Yours sincerely

Rochelle Maxwell  
Assistant Headteacher
